#### Best before

See expiry date and batch stated on the base of the bag.

## ESSENTIAL FOODS

### A FEW WORDS ON THE WONDERS OF PÂTÉ

---

Our cuts of chicken in a thick, savoury gravy provide an exceptionally delicious meal. If you haven't seen it for yourself yet, just wait for your cat's first taste and you'll know what we're talking about. Besides its many qualities in taste and texture, it offers a range of nutritional benefits by virtue of its high water content. We won't bore you with the evolutionary background of it or list all of the many benefits, but we will allow ourselves to mention just a few of them in order to open your eyes to some of the many wonders of this dish.

**1/** It offers superior nutrient absorption as the nutrients are delivered in 'wet form'.

**2/** It goes down effortlessly, easing the intestinal workload for gentle digestibility.

**3/** Thanks to the high water content, it naturally helps your cat stay hydrated. It's ideal for those with a tendency to forget to drink enough water throughout the day.

**4/** This is a type of food that is suitable for all stages of life, including those where you have few or no teeth.

**5/** It can be prepared more gently, at a lower temperature, preserving both texture and nutrients.

**6/** Our wet meals are low in starch, rich in meat and cooked at a lower temperature, making them more than BOF-approved with the aim of keeping your cat's blood sugar levels stable.
